Organization Overview

Name: ZARA

History of Organization

ZARA is a global fast-fashion brand founded in 1975 in Spain by Amancio Ortega and Rosalia Mera. It started as a small store aiming to make fashionable clothing affordable. Over time, it became the flagship brand of Inditex, the world's largest fashion retailer. Zara now operates thousands of stores in over 96 countries and has a strong online presence with digital sales contributing significantly to its revenue.

Vision Statement

The vision of Zara is to become a global leader in sustainable fashion, aiming to achieve both strong financial success and leadership in environmentally responsible practices within the fashion industry.

Mission Statement

The mission of Zara is to quickly deliver what customers want, focusing on speed, responsiveness, and meeting customer demand more efficiently than competitors.

Target Audience

Zara has a target audience of men and women aged 18-40, mainly focusing on Millennials and Gen Z who are Fashion-conscious and tech-savvy.

Website Goals and Objectives

The goal for the website is for customers to be able to navigate the website with any trouble. We want them to be able to captured by the experience of buying online and provide a convenient and efficient alternative to standard shopping. The aim is to provide customers with a variety, and savings by allowing consumers to shop anytime, compare prices easily, access detailed product information, and enjoy secure, personalized purchasing experiences.

We must that we regularly check for any errors, make sure that the website is working they way want it to work for the best customer experience.

Current Website Analysis

Weaknesses

- The website has no specific categories for the clothing. There is no tab for men/women clothing navigation
- The website appears to be disorganized and messy.
- The website prioritizes the how appealing it will look to customers over the fact that customers may have a specific clothing they are looking for.

Strengths

- The website is very aesthetically pleasing to minimalistic people.

Areas of improvement

- Add structured menu with clear categories such as Men, Women, Accessories, etc..
- Include Subcategories such as Tops, Bottoms, Shoes, etc...
- Balance the design with functionality.
- Group related items together logically.
- Limit unnecessary elements to reduce visual clutter.

Proposal Features and Functionality

Homepage

- The first page will be clean, well- organized
- There will be the following:
 - Logo
 - Menu
 - Search Bar

About Us

- Will include the mission and vision statement
- The goal of the Brand

Contact Page

- The number for any questions
- The email of the brand
- The social media links for the brand
- The link for app

Products/Services Page

- The Add to Cart
- Search Bar
- Filters and Sorting Options
- Product Lists

Design and User Experience

The website will have the following aesthetic and branding:

- Colour Scheme: Monochromatic palette of whites and browns
- Typography: Readable Fonts, different fonts, black as text colour
- Layout and Design: Header, Search icon, Contact Us Tab
- User Experience Considerations: Try not use bright colours

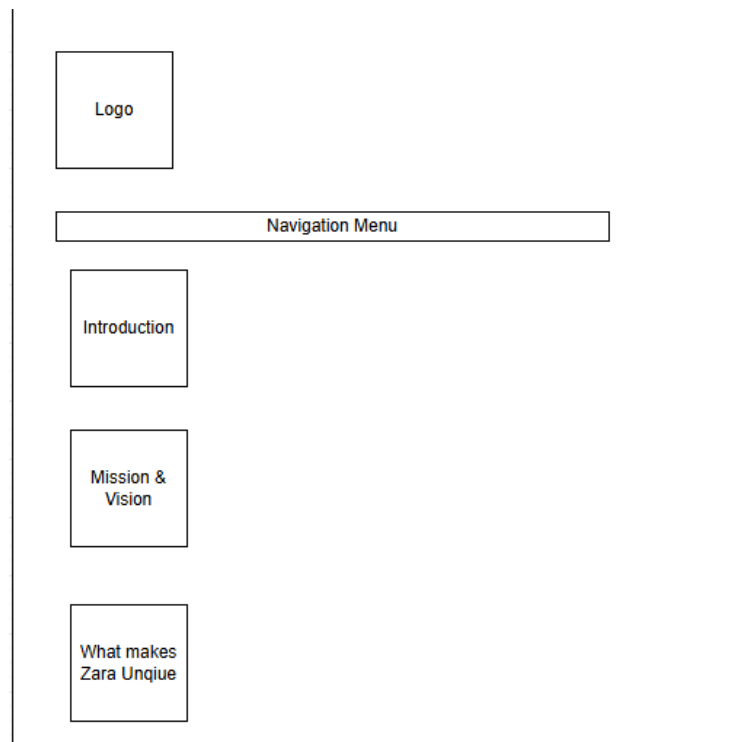

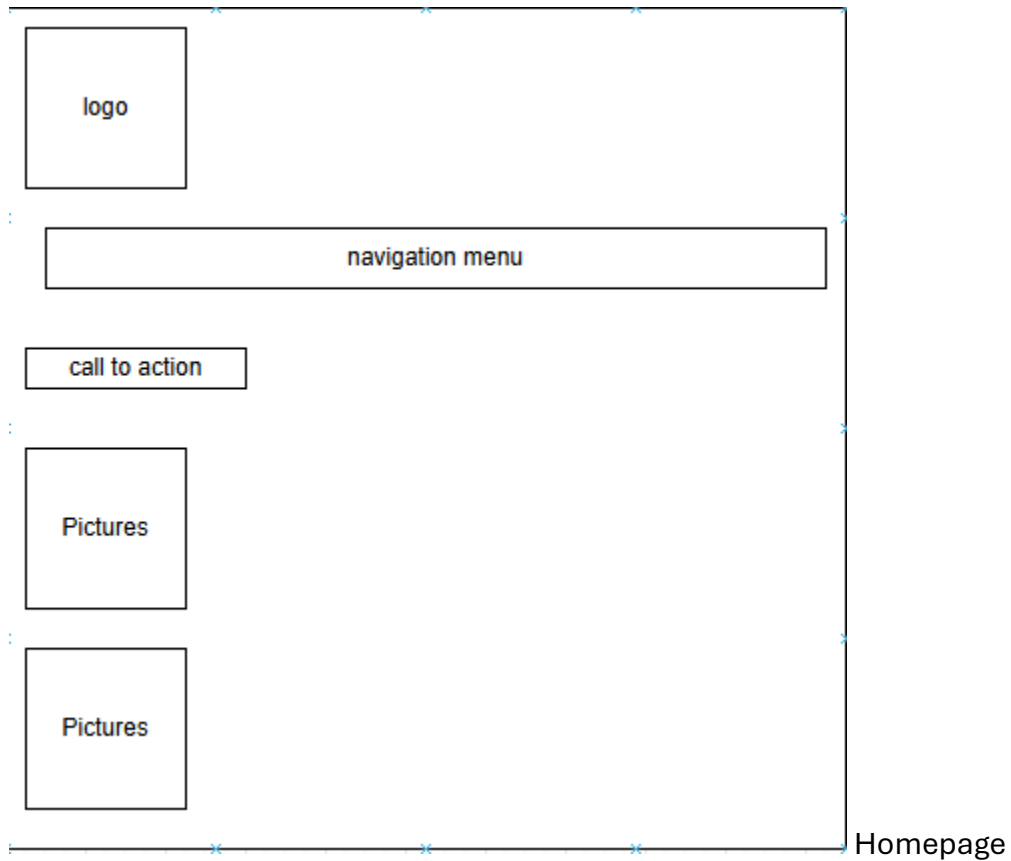

Technical Requirements

- The first part will be done in HTML for the structure of the website.
- The second part will be done in CSS.
- The last part will be done in JavaScript.

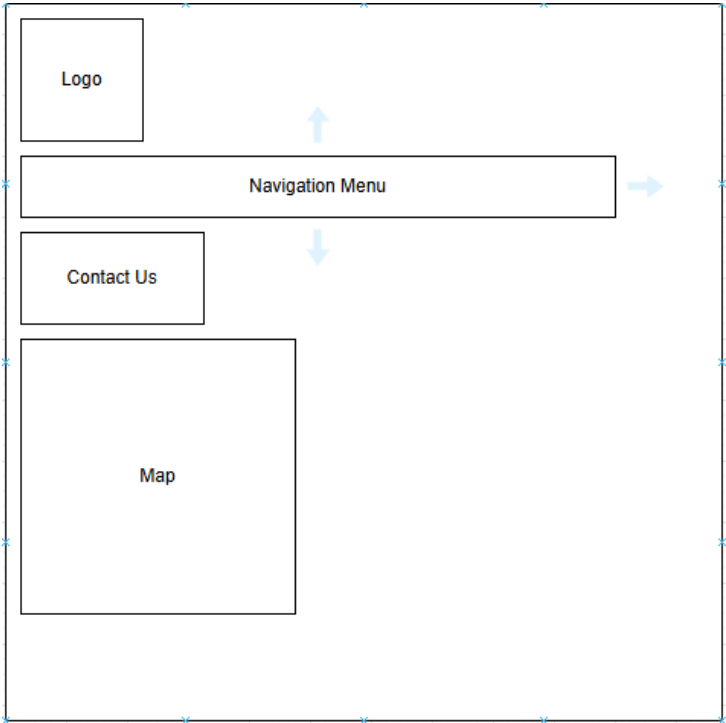

Timeline and Milestones

- Part one: Submitted on the 20th of April.

Timeline And Milestones

Timeline	What Was Done	Milestone
Week one	The research for the two proposals. The research took two days to.	Planning of what kind of website will be designed.
Week two	The first and second proposal were composed in the second. The first three days was proposal 1. Then, on fourth to the sixth days was proposal 2.	The planning of what will be included in the website: The technical requirements, Typography, colour scheme, the layout and design.
Week three	This week was when we had to submit the proposals to our Lecturer so that she could choose the best out of the two so we can design	This is also part of the planning part of the work.
Week four	In this week the folder structure and index of the the website was developed. The proposals were turned into copies of PDFs and the index(homepage). Also the pictures were also looked for.	This is the development part of the design process.
Week five	In this week the about us, contact us, pages were developed. The information in those pages was majority taken from the proposal but additional was researched and put in the webpage accordingly.	This is the product upload part of design process.
Week six	This week the enquiries and services pages were developed.in this week a query form and the pictures were put in the appropriate webpages.	This is the product upload part of design process.
Week seven	This week the checking for errors, broken links, and submission of the whole website and proposals was done	This is the Testing and submission of the website.

Budget

- Housing: R80 – R300
